"I am proud to have had the opportunity to see the beginning and progress of Lake City Medical Center throughout the years - from before my retirement as a physician in 1988 to now. Lake City Medical Center has demonstrated its commitment to improving and effectively meeting the healthcare needs of our community by constantly updating its equipment and facilities with the latest technology and recruiting top-notch physicians and staff."

Dr. Jose Goyenechea  Retired Physician and Patient
I am proud to present the Lake City Medical Center 2010 Community Benefit Report. The information included within this report is an overview of our commitment to the highest quality healthcare experience in Lake City and the surrounding communities. You should not have to travel long distances for medical care, and that is why we provide you with award winning medical care right here at home.

The last year brought many challenges and changes for the healthcare industry. However, in spite of local and national economic challenges, including much debate over the future of healthcare, Lake City Medical Center made exceptional strides in improving the quality and selection of medical services available to area residents.

Here are a few highlights from the last year:

In February of 2010, we opened Primary Care Center of Jasper. Under the medical direction of Daniel Messcher, M.D.; Lori Belote, ARNP and staff, the clinic provides immediate and primary care services to the residents of Hamilton County.

LCMC began offering the residents of Lake City and the surrounding areas access to neurologists 24 hours, seven days a week. Our Teleneurology service provides a complete telemedicine solution for patients requiring neurological care. Now that NeuroCall’s neurologists are on board, patients have immediate access to a consultation with these specialists. Expertise in all facets of neurology is delivered using a high speed internet connection and camera-cart-system. A specialist appears on the screen within minutes to evaluate and direct treatment for the patient.

Lake City Medical Center and Gateway Surgical Specialists joined together to offer EsophyX TIF, a procedure not performed in Gainesville. EsophyX TIF provides a new choice in the treatment of acid reflux and GERD.

North Florida Cancer Center is now The Cancer Center at Lake City. As an affiliate of Lake City Medical Center, The Cancer Center at Lake City is Lake City’s best choice for cancer care services in Columbia County. Also, with the Center’s affiliation with The Cancer Center at North Florida Regional Healthcare, patients are provided with increased options and leading edge treatments, including access to Cyber-knife technology.

Our staff participated in over 26 health fairs and screenings in 4 different counties, reinforcing our dedication to improving the overall health of the communities we serve.

We now also offer specialized Women's Health services, including a Nurse Navigator Program to guide breast cancer patients throughout the clinical process.

It is the combination of these ongoing efforts that has lead to our 11th year as the Lake City Reporter’s “Best of the Best Hospital” in Lake City. Lake City Medical Center is proud to serve our community and to help make it a better place to live, work and thrive.

Without the hard work and dedication of all of our talented employees, physicians and volunteers, we would be unable to accomplish the task of continuing to make healthcare the best it can be in our area.

CHARLES BRISCOE, CEO
Lake City Medical Center
Established in 1971, the Frist Humanitarian award honors outstanding individuals for their humanitarian and volunteer activities. The Frist Humanitarian Awards are given annually in recognition of the caring spirit and philanthropic work of the late Dr. Thomas Frist, Sr., a founder of HCA. Employees, volunteers and physicians who demonstrate commitment and dedication to providing care and humanitarianism are selected by their peers and honored for their efforts.

L-R: Volunteer recipient, VIOLET HANCOCK; physician recipient, DR. BEN SAMERA; and employee recipient, MICHELLE ROSBURY, RN, BSN.

GIVING BACK to OUR COMMUNITY

THE FUTURE OF HEALTHCARE

In addition to the support of the Nursing Program at Florida Gateway College, Lake City Medical Center also hosts a day of the Allied Health Programs’ annual summer camp for area middle school students. This opportunity is provided to students interested in pursuing a career in the healthcare industry. The day includes hands on experiences, tours of the hospital departments and presentations by experienced hospital staff. LCMC is proud to take an active role in training tomorrow’s physicians, nurses and other healthcare professionals.
Breast Cancer Awareness

Lake City Medical Center and The Cancer Center at Lake City are your community partners in the fight against Breast Cancer. Knowing that awareness is an important part of that fight, LCMC, The Cancer Center at Lake City and Columbia County Resources proudly hosted the 4th Annual Tough Enough to Wear Pink Breast Cancer Forum Luncheon. The luncheon was attended by more than 275 community members who joined together to learn more about breast cancer prevention and treatment and to recognize those who have battled the disease. An additional luncheon was offered in Hamilton County to take the message beyond our city. In addition, Lake City Mayor Stephen Witt proclaimed Tuesday, October 5, 2010 as Wear Pink Day, a service project to support cancer awareness, outreach and activism sponsored by Altrusa, Lake City Medical Center and The Cancer Center at Lake City.

Healthcare in Your Hands

The world of technology is constantly changing. These changes also affect the healthcare industry. That is why Lake City Medical Center is always looking for ways to keep our patients and visitors on the leading edge of medical information technology.

Access to 9-1-1, immediate medical treatment, physician locator, medical library and more is now available through iTriage, an app for iPhone and Android users, bringing highly relevant information to patients when they need it. Patients, their families and visitors can also access average LCMC ER wait times by texting “ER” to 23000 from your cell phone or by visiting LakeCityMedical.com.
"Helping my patients and our community members understand the importance of healthy eating and proper diet is my number one priority. By providing the necessary health and prevention information at local health fairs and screenings, we are helping to make Lake City a healthier place to live."

JERIANN GONZALES, MS, RD, LD/N
Lake City Medical Center Chief Clinical Dietician

HEALTH AND WELLNESS SCREENINGS

The focus of the physicians and staff of Lake City Medical Center is improving the health of the population we serve. In 2010, hospital staff participated in more than 26 health fairs and screenings in Lake City, Live Oak, Jasper and other surrounding areas, offering blood pressure checks, cholesterol tests, body mass index readings and other screenings. The Lake City Medical Health and Fitness Fair, held on May 26, 2010 at the Columbia County Fairgrounds, was attended by more than 250 area residents and 35 organizational vendors. Providing the community with appropriate information enables individuals to take charge of their healthcare and be involved in the process leading to improved health and well-being.
“As a large facility, we realize the responsibility we have to incorporate environmentally sound practices into the healthcare industry. Through our sustainability program, we are working to reduce waste and make Lake City Medical Center a more eco-friendly facility.”

NATE NELSON
Lake City Medical Center Director of Environmental Services
INTERNATIONAL SERVICE

Lake City Medical Center had the privilege of hosting a Rotary International Group Study Exchange from India. This program, provided by The Rotary Foundation of Rotary International, is a unique cultural and vocational exchange opportunity. The program provides travel grants for teams of participants to exchange visits between paired areas in different countries to observe their own vocations as practiced abroad. A dinner and tour of the hospital facilities were held to welcome and honor exchange participants. Staff of Lake City Medical Center also participated in the Rotary Club’s Purple Pinkie Project at Westside Elementary School. This worthwhile cause helps to raise funds for Rotary International’s PolioPlus Program to help eradicate polio.

QUALITY IMPROVEMENT

Lake City Medical Center is continuing to exceed the benchmarks set by Department of Health and Human Services’ Center for Medicare and Medicaid Services for the treatment of heart attack, heart failure, pneumonia and surgical infection prevention. You can view our results at www.hospitalcompare.hhs.gov. Also, with our Aim for Zero initiative, our team is committed to achieving among the lowest infection rates in the region.

CONSULT-A-NURSE

Last year, more than 1,800 people called Lake City Medical Center’s Consult-A-Nurse and physician referral line. The service is free and available all day, every day. Callers can receive a physician referral, nurse consultation or register for a hospital class or event by calling (800) 525-3248.
AWARDS AND RECOGNITION

Many awards and recognitions are bestowed on our facility and management team, acknowledging not only the outstanding medical care and services we provide, but also the leadership role we play in our community. Our facility is recognized for our commitment to quality care by the most respected organizations in healthcare, including the Agency for Healthcare Administration and The Joint Commission. Our facility has been voted by the readers of the Lake City Reporter as the “Best of the Best” Hospital in our community for eleven consecutive years and was voted “Best of the Best Medical Clinic” in our community for four consecutive years.

SEASONAL FLU AND H1N1 PREPARATION

Lake City Medical Center joined other HCA facilities in enforcing stringent standards in preparation for flu season. With heightened concerns regarding the spread H1N1, or swine flu, employees providing direct patient care were required to receive the seasonal flu vaccine. The H1N1 vaccine was also made available for those providing direct patient care. Special signs were posted throughout our facilities with reminders for patients, visitors, and employees to take precautions to help avoid spreading the flu to others. Hand sanitizers were conveniently placed at entrances and public areas to heighten awareness of the importance of hand cleansing. In addition, a process was put in place to track presenting symptoms through the ER and confirmed H1N1 cases to monitor for trends that would indicate an outbreak in a specific community.

VOLUNTEER SERVICES

An important piece of Lake City Medical Center is our volunteers. The dedication and commitment of the LCMC Auxiliary is truly remarkable. Without the hard work and smiling faces of our volunteers, we could not reach the high level of patient satisfaction and quality of service that we achieve. In 2010, the LCMC volunteers donated 12,339.5 hours of precious time, bringing the organizational grand total to 303,113 hours. In addition to the many hours of service, the Auxiliary also donates more than $17,000 each year to local charities from proceeds received from the Lighthouse Gift Shop located at the hospital.

We are proud to have this group of individuals as a part of our hospital family and community.

TINA HAVER, 2010 Lake City Medical Center Auxiliary President, volunteers in the Lighthouse Gift Shop at Lake City Medical Center
CONTINUOUS QUALITY IMPROVEMENT

Despite our achievements, HCA North Florida recognizes the importance of patient safety and continues to make it paramount. Quality care is important to every patient. But how can you really know the care you’re receiving is the best? The Agency for Healthcare Research and Quality, the lead federal agency tasked with improving healthcare nationwide, defines quality healthcare as doing the right thing at the right time in the right way to achieve the best possible results. At Lake City Medical Center, our team of physicians and staff lives by this definition every day. In fact, we have been recognized for our commitment to quality care by the most respected organizations in healthcare. Just a few ways of how we are continuing to improve quality of care at Lake City Medical Center include:

- **Lake City Medical Center’s Aim for Zero initiative**: Our team is committed to achieving among the lowest infection rates in the region.
- **An electronic medication administration barcode system** to ensure that Lake City Medical Center’s patients always receive the correct medication and dosage.
- **New operating room tracking screens at Lake City Medical Center** allow family and friends in the surgical waiting rooms to receive up-to-the-minute status updates on their loved ones.

"In an effort to further protect our patients, Lake City Medical Center has implemented an electronic medication administration barcode system. The installation of this system is just one more example of how we are committed to continuous quality improvement and the highest standards of medication safety and accuracy."

**JANIE KILLIAN, RPh, Lake City Medical Center Director of Pharmacy**
PATIENTKEEPER (PK) VITALS CAPTURED

PK Vitals Capture is a computer software application that streamlines the process of capturing and recording patient vital signs and intake/output data. Nurses and patient care technicians (PCTs) enter this information into a handheld device right at the patient’s bedside, saving time while also helping to avoid possible errors due to duplicated efforts. The information is transferred into Meditech MIS – the hospital’s information system – wirelessly within a few minutes of being entered into the handheld device. This allows for faster, more accurate information for both nurses and physicians and less time spent documenting by the PCTs.

SEVERE SEPSIS PROGRAM

Severe sepsis is the most common cause of death in the ICU nationally. Healthcare costs to care for patients with severe sepsis are nearly twice as high as those for other patients, and mortality rates are much higher as well. The Sepsis Program includes a four-tiered process and use of evidence-based bundles along with a designated sepsis coordinator. Team efforts are initially focused in the ED and ICU, with plans to go house wide.

INTERMEDHX (RXHX)

Providers are routinely tasked with obtaining a list of a patient’s current home medications – a valuable part in the diagnosis and treatment of their patients. RxHx is designed to function as step 1 in this process by querying participating source medication databases, including pharmacies, payers, and pharmacy benefit managers. RxHx extracts available medication data, such as drug names, dosage, route, and frequency, and prints a personalized medication report - all within minutes of the initial registration. The attending practitioner can then easily review the report with the patient to verify the content and check for any OTC medications, physician samples, and health supplements taken. With today’s growing nursing and pharmacist shortages, RxHx can enable a provider to reallocate valuable professional time to other tasks and functions which, in turn, can further reduce medical errors.

"Our main focus at Lake City Medical Center is patient safety. We adhere to a specific set of Core Measures that hold hospitals and providers accountable to provide the highest quality care. These national standards ensure an environment of continuous quality improvement and increased patient safety, providing an excellent healthcare experience for our patients."

PETER W. GIEBEIG, JR., M.D.
Chief of Staff, 2010
EMERGENCY EXCELLENCE

Highly skilled emergency physicians and nurses combined with best practices and the latest technology benefitted nearly 25,000 patients in 2010. Direct communication begins in the field with local EMS teams to ensure continuity of care for our patients and our commitment to improve quality in our busy emergency department. Our strong focus on enhancing care and improving ER processes has also dramatically reduced wait times. Average ER wait times are now posted on our hospital website and are available by texting “ER” to 23000 from your cellular phone.

In 2010, Lake City Medical Center began offering the residents of Lake City and the surrounding areas access to neurologists 24 hours, seven days a week. Our Téleneurology service provides a complete telemedicine solution for patients requiring neurological care. Now that NeuroCall’s neurologists are on board, patients have immediate access to a consultation with these specialists. Expertise in all facets of neurology is delivered using a high speed internet connection and camera-cart-system. A specialist appears on the screen within minutes to evaluate and direct treatment for the patient.

"Through our new Téleneurology service, Lake City Medical Center has made it possible for area residents to have an immediate consultation with a neurologist in cases of potential stroke or seizure. With this leading-edge technology, we are better able to serve the emergency needs of our community."

DEBBIE WINGATE, RN
Lake City Medical Center Director of Emergency Services

THE CANCER CENTER

Cancer is the second leading cause of death in the United States. Someone you know has been or may be affected by this disease. The Cancer Center at Lake City offers the most technologically advanced cancer treatment in our community including Cyberknife stereotactic radiosurgery through our affiliation with The Cancer Center at North Florida Regional Healthcare. Our expertly trained physicians and staff provide high quality care in an atmosphere of warmth and comfort. Mark E. Thompson, D.O., directs patient care services provided at the Center.

The Cancer Center at Lake City offers:

- Intense Modulated Radiation Therapy (IMRT)
- Image Guided Radiation Therapy (IGRT)
- High Dose Rate Brachytherapy (HDR)
- MammoSite
- Prostate Seed Implants
- Cyberknife Radiosurgery*
- Mobile PET / CT Services On Site
- National Clinical Trials (RTOG)
- GE CT Simulator
- Varian Linear Accelerator

*Cyberknife centers in Jacksonville and Gainesville
IMAGING SERVICES

Lake City Medical Center and Invision Lake City Outpatient Imaging provides the most comprehensive array of outpatient and inpatient imaging services for our community. Our facilities are equipped with a broad range of diagnostic technology and offers extended hours. Doctors Imaging Group of Gainesville provides the radiology services.

Diagnostic and Treatment Services:
- MRI
- CT
- Ultrasound
- Digital Mammography
- Bone Density
- Nuclear Medicine
- X-Ray

We are committed to offering imaging services needed across the full continuum of a patient's care. Each patient receives the highest quality service in their own community.

CARDIOVASCULAR SERVICES

The Lake City Medical Center Cardiovascular Center is your partner in the fight against heart disease and peripheral vascular disease. We offer state-of-the-art Cardiac Catheterization and Non-invasive Cardiovascular Testing staffed by highly experienced technologists and nurses on both an inpatient and outpatient basis. The team of professionals at our Cardiovascular Center, including physicians from both Cardiology Associates of Gainesville and Interventional Cardiology of Gainesville, performs over 1,000 procedures each year.

Diagnostic and Treatment Services:
- Cardiac catheterization
- Peripheral vascular angiography and stenting
- Renal angiography and stenting
- Cardioversions
- Cardiac device implants (pacemaker, defibrillators, internal event monitors)
- Non-Invasive Cardiac Testing

Lake City Medical Center Cardiovascular Center also offers a variety of non-invasive cardiology procedures that are often the first step in diagnosing a possible problem in the cardiovascular system.

Other Cardiovascular Services:
- Stress testing (treadmill and nuclear scan testing)
- Echocardiograms – an ultrasound of the heart.
- EKGs
- Electrocardiogram monitoring – The rhythm of the heart is monitored for 24 to 48 hours to detect any problems which may require a pacemaker or medications.
- Venous doppler studies
- Carotid studies

“...The Cardiovascular Center at Lake City Medical Center offers area residents a state-of-the-art cardiac cath lab. I am proud to work with other medical professionals and expertly-trained physicians as a partner in the fight against heart disease at a facility offering convenient access to a broad range of cardiovascular services.”

HENRY MARTINEZ, EMT-P, Lake City Medical Center Cardiovascular Technician
SURGICAL SERVICES

Our Surgery Department provides quality care for inpatients and outpatients requiring surgical interventions. We are available to meet all of your surgical needs including general surgery, advanced laparoscopic procedures, ENT, urology including brachytherapy for prostate cancer treatment, plastic surgery, hand surgery, podiatry and gastroenterology in the most comfortable setting with the most advanced technology.

In 2010, we added the Big Board OR Tracker system. Family members of surgery patients at Lake City Medical Center have something new that may ease the anxiety of waiting for their loved ones. With the installation of this new technology at the hospital, families can track patients through all stages of surgery on screens in place at different locations at the medical center. The screens display the name of a patient’s surgeon, whether the patient is in holding, pre-op, in surgery, recovery or returning to a room. The information is updated every 30 seconds and is listed next to only four initials from the patient’s name to protect privacy.

REHABILITATION SERVICES

Our Rehabilitation Center offers a broad range of services, including physical therapy, occupational therapy and speech therapy. We provide inpatient and outpatient treatment to patients of all ages. Our team of rehabilitation specialists customizes care to meet patient and family needs. We are committed to returning those individuals who have been impaired by accident or disease to their highest level of independence by optimizing abilities and skills in everyday activities. The Rehabilitation Center is located in the Medical Center Plaza North, NW Medical Center Lane across the street from the entrance to the Emergency Room of Lake City Medical Center.

“At Lake City Medical Center, we assess and treat each patient according to their specific needs. Whether it is a child or an adult, our focus is to help our patients meet their goals of achieving the best possible quality of life through individualized rehabilitation treatment.”

STEVE NELSON, PT, MBA
Lake City Medical Center
Director of Rehabilitation Services
Lake City Medical Center understands the need for specialized care for the women in our community. That’s why we have established our Women’s Health services to better meet the medical needs of women in our area. Services available through Women’s Health at Lake City Medical Center include:

- Ultrasound
- Digital mammography
- Stereotactic breast biopsy
- Bone density
- MRI and CT
- Urology
- Cardiology
- General Surgery

At Lake City Medical Center we believe in providing support and resources to our patients and their families. Through the Nurse Navigator Program, we do just that. Our patients who require follow-up after a diagnostic mammogram will receive the support of a nurse dedicated to meeting the needs of that individual. Our goal is to provide the patient with one point of contact for all questions, concerns, and needs. The Nurse Navigator is available at the facility during normal business hours and by phone 8:00 am to 8:00 pm seven days a week.

In July of 2009, Lake City Medical Center started a full-time Hospitalist Program. The Hospitalist Program consists of physicians who are specially trained in inpatient care and are trained in internal, pulmonary, and critical care medicine. As “quarterbacks” of the healthcare team, they coordinate care with other health professionals throughout a patient’s stay, keeping the patient’s primary care provider informed along the way. These physicians work closely with your primary care physician and are available 24 hours a day, seven days a week.

"The role of Nurse Navigator adds a more personal touch when providing care to our patients, helping to address needs that may be physical, emotional, psychological, and even spiritual as expressed by each patient individually. By working together with individuals facing important healthcare decisions as well as the community as a whole, Lake City Medical Center is striving to play a key role in reducing the effects of Breast Cancer in North Central Florida".

DONNA PERKINS, RN, Lake City Medical Center Nurse Navigator
Primary Care Center of Live Oak and Jasper exist to serve the immediate and primary care needs of the residents of Suwannee and Hamilton counties. Under the medical direction of Daniel Messcher, MD, a board-certified Family Medicine practitioner; Lori Belote, ARNP and staff, the Primary Care Centers of Live Oak and Jasper offer the following services:

- **Primary Health Care**
- **Immediate Care of non-critical injuries and illnesses**
- **Occupational Medicine**
- **Physicals: back to school, sports, and occupational**
- **Injections and inoculation**
- **Minor laceration repair**
- **Treatment of minor burns or scrapes**
- **Worker’s Compensation Injury**
- **Motor Vehicle Accidents**
- **Wellness screenings**
- **Health counseling**
- **Women’s Health and exams**
- **Cryotherapy**

In 2010, Primary care center of Live Oak added the Unitixs Revo 1100 peripheral vascular diagnostic system. This leading edge equipment allows for diagnosis of Peripheral Artery Disease (PAD), a condition affecting about 8 million Americans, right in the office. Web sites were also launched for each clinic as an additional resource for patients and can be found online at PrimaryCareofLiveOak.com and PrimaryCareofJasper.com.
